

Swivelpole™

INCORPORATING

maxis™

IMAGE COURTESY OF WOODSIDE

Maxis™ is the next generation lowering pole solution for safely accessing light fixtures and equipment.

The Maxis™ difference

- Superior 45° lowering pole technology
- Cast steel joint with minimal moving parts
- Suitable for hazardous locations and harsh environments
- The only solution that allows conversion of existing poles to lowering poles

Safety

Light fixture is inverted and lowered to a safe working height and ergonomic service position.

Simplicity

Easy to install and operate. Allowing easy upgrade to LED technology.

Savings

Maximised profit through substantially reduced operating and maintenance costs.

Flexibility

Multiple product configurations to suit Greenfield and Brownfield applications.

Solutions

Greenfields

Choose from our range of complete pole solutions to suit many applications.

Brownfields

Convert existing poles by installing the Maxis™ joint with the help of the Pole Conversion Tool Kit.
